DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 10 is rejected under 35 U.S.C. 102(a) as being anticipated by Choung (6,332,778 B1). Choung shows a dental implant apparatus with expandable side for locking into a hole in bone having an upper conformal socket 18, a hollow expansion tube 10 with a wall 15 having alternating ribs and open spaces, and a lower retaining nut 60. The hollow expansion tube is compressible along a major axis by tightening a retaining compression screw 30 through the socket, the tube and the retaining nut, and the ribs expand outward upon tightening of the screw. The hollow expansion tube has a truncated conical shape (column 3, lines 52-54) to better mimic the normal root shape of a tooth (column 3, lines 51-52).

Allowable Subject Matter

Claims 3, 5-7, 9 and 11 are allowed.

Claim Objections

Claim 6 is objected to because of the following informalities: In line 8, the word "comprising" appears twice. Appropriate correction is required.

Art Unit: 3732

Drawings

The corrected or substitute drawings were received on August 20, 2003. These drawings are approved.

Response to Arguments

Applicant's arguments with respect to claim 10 have been considered but are moot in view of the new ground(s) of rejection.
